A721 Grey blue

A728 Anthracite grey

A722 Grey green

A729 Stone Red

**Please note:**

Minor variations between the colours shown here and the actual colours are due to printing technology and the materials used.

## And this is how it's done ...

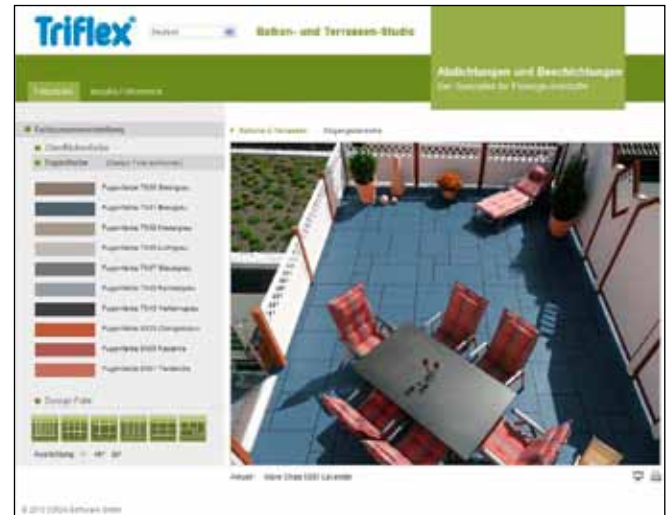

Surfaces which have been waterproofed or coated with Triflex are then finished with a coloured Triflex Cryl Finish. Either Triflex Micro Chips or Triflex Colour Mix is added to the fresh finish. This allows coloured and textured finishes to be created.

Further visual effects can be achieved with Triflex Creative Design. Whether joint patterns, company logos or other creative decorations – with the Triflex Creative Design sheet any surface can be customised.

## See your finished surface beforehand ...

You want to know what your finished roof terrace or balcony is going to look like beforehand? With the online "Triflex balcony and terrace studio" programme this can be achieved both simply and quickly. The design software offers a pre-selection of application examples which can be used to provide a first impression of the variety of designs offered by Triflex.

If you are planning a specific project, simply upload a photo and get designing with all Triflex surfaces from the standard Triflex Micro Chips through to the innovative Triflex Creative Design. The edited photos can be simply copied and pasted to your planning documentation. Give it a try! For further details go to [www.triflex.com](http://www.triflex.com) or directly to [www.triflex-studio.com](http://www.triflex-studio.com).
